

Free Windows 10 Management

Part of Miradore Online's Free Plan

Benefits

- Windows 10 desktop management made easy
- 100% from the cloud - No infrastructure needed
- Manage Windows 10, iOS and Android devices with ease
- It's FREE

Overview

While mobile devices are gaining market share, the main device for work and productivity is still the workstation. **Managing desktops and laptops** has traditionally required installing servers and software, configuring networks and setting up infrastructure. It has required up-front investment, time, and expertise to pull off.

To solve this issue, Miradore Online now supports desktops and laptops running Windows 10, providing an easy to use, single point of access to your entire environment. Unified Endpoint Management (UEM) now comes in an easy to use, no up-front cost, zero infrastructure package.

Features

Specifications

Up-to-date Inventory

Miradore automatically collects a wide range of information about your Windows 10 devices and makes reporting easy.

Manage your IT Assets

Identify your IT assets by understanding who is using them and what models they are. Make sure your hardware is up to the task and plan your refreshes.

Secure Data

Verify your devices' encryption, antivirus and firewall status. Verify that there are no unauthorized apps installed. If a device is lost, make sure your data gets remotely wiped.

Unified Endpoint Management

Instead of multiple complex systems, have a single view into your entire environment - whether desktop, laptop, phone or tablet.

Delivery specifications

- Windows 10 Management is available on all Miradore Online plans.
- Navigate to www.miradore.com and click 'Get Started.'
- Provide your Company name, login name, and password to create your UEM site.
- You may start to add your Windows 10 desktops and laptops immediately to the service and start securing, controlling and managing your Windows 10 devices.

Requirements

- The managed devices must run Windows 10. Features may vary by Windows 10 version and edition.
- An internet connection to the service must be available.
